ALVA PROTECT

MITE, FLEA & TICK SPRAY

AlvaProtect is a natural defense general spray or cloth on product. Preventing ticks is always better than having to remove them. Ticks are blind and ticks will latch onto dogs passing through grassland and tall grass. Harvest mites are microscopic, red-orange arachnids (like spiders) that are a problem from late summer to autumn, attacking areas of thin skin, such as the feet, ears, and belly. This causes intense itching, scratching, and potentially hair loss or skin infections. Spraying or clothing this product as a preventative or applying the solution directly onto areas that are affected as an affective treatment.

CONTAINS

Camphor, Catnip & Neem Seed Oil.
